

# DYNAMIC VACUUM DRIVE

**BORA<sup>®</sup> DVD<sub>2</sub>:**  
**ACTIVE AND DYNAMIC MANAGEMENT OF VACUUM**  
**PROCESS PRODUCTION/CONTROL**

## TECHNICAL FEATURES

**Booster** driven to **highest performances**

**Protection of mechanical parts** (system keeps compression ratio within optimum range of booster)

**Greater performances** than hydrokinetic joints, high-slide motors, or bypass.

**User programmable (DVD<sub>2</sub>) vacuum level**

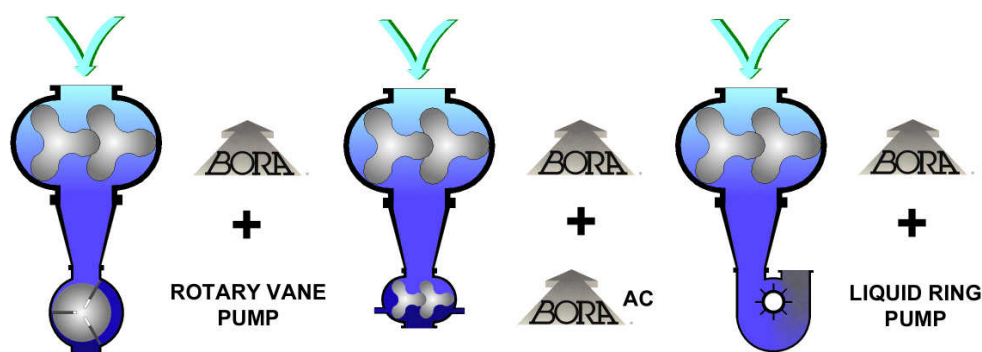

Significant **reduction in draw-down times**

Wide operating range. Between **900-0.01** mbar absolute.

**Compatible (DVD<sub>2</sub>) with all brands of frequency converters**

Suitable for use **with mechanical or liquid ring vacuum pumps**

**ADAPTABLE TO EXISTING SYSTEMS, IMPROVING THEIR PERFORMANCES!**

## APPLICATIONS

- Chemical-pharmaceutical process
- Autoclaves evacuation
- Centralized vacuum systems
- Large vacuum packaging systems
- Extruders degassing
- Vacuum dryers
- Vacuum freezers
